

Monthly Safety Meeting

Your stick and rudder skills are superb, but does that make you an excellent pilot? Not hardly. The mental side of Positive Aircraft Control is just as important to your flying safety -- in large part by staying ahead of the aircraft and maintaining situational awareness and focus. To explain this, Pete McElvain (FAASTeam Representative, former Air Force pilot, and current Corporate Pilot/CFII/MEII) has prepared a program entitled "Zen and the Art of Aircraft Control: Managing Pilot Workload, Distractions, and Pressures." He's even thrown in some amateur psychology at no charge. Wings credit will be awarded to attendees.

Directions: Drive to 1801 9th St, Wichita Falls.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
